

TEJA SANKARA

Full Stack Software Engineer (.NET | React | Azure | Cloud)

✉teja.uta@gmail.com | 📞 (513) 496-4544 | <https://www.linkedin.com/in/teja-sankara-719660196/>

PROFESSIONAL SUMMARY

Creative and results-driven Full Stack .NET Developer with 4 years of experience building robust, high-performance web applications using ASP.NET Core, ReactJS, C#, Java and SQL/Oracle databases. Skilled in developing secure RESTful APIs, optimizing back-end logic for scalability, and delivering responsive, user-centric UIs with modern JavaScript frameworks. Experienced in Agile development, CI/CD automation, and cloud environments (Azure, AWS) to streamline delivery and enhance system reliability. Known for strong problem-solving abilities, clean coding practices, and a passion for creating innovative, efficient solutions that drive measurable business results.

PROFESSIONAL EXPERIENCE

Elevance Health(Cognizant Contract) — Software Developer

Jul 2023 – Present

- Designed and implemented RESTful APIs to streamline integrations between provider credentialing, licensing, and compliance systems, reducing manual intervention by 40%.
- Led end-to-end development of enterprise web applications using ASP.NET Core MVC, Web API, and ReactJS, improving system scalability and performance by 35%.
- Developed reusable React components and optimized front-end performance through efficient state management using Redux and React Hooks.
- Built complex SQL queries, stored procedures, and views in Oracle and SQL Server, improving data retrieval times by 25% for high-volume datasets.
- Implemented authentication and authorization mechanisms using OAuth 2.0 and JWT, enhancing application security and access control.
- Automated CI/CD pipelines using Azure DevOps for faster, error-free deployments and reduced release time by 30%.
- Collaborated closely with business teams and QA engineers in Agile/Scrum environments, ensuring on-time delivery of sprint goals and minimizing production defects.
- Applied SOLID principles and Design Patterns to build scalable, maintainable codebases, improving overall system reliability.
- Mentored junior developers on .NET and React best practices, helping the team improve code review efficiency and consistency.

Infogain — Software Engineer

Jul 2021 – Nov 2021

- Developed and maintained full-stack web applications using ASP.NET Core, ReactJS, and TypeScript, delivering high-performing and user-centric solutions.
- Built and integrated RESTful APIs to connect front-end components with backend services, improving data flow efficiency by 35%.
- Designed and optimized Oracle and MySQL database queries, reducing response times by 40% and improving scalability.
- Implemented modular React components with reusable UI patterns, decreasing front-end development time by 25%.
- Collaborated in an Agile environment to enhance feature delivery speed and maintain code quality through peer reviews.
- Developed unit and integration test cases using Jest and NUnit, ensuring 99% build stability during CI/CD pipelines.
- Deployed containerized applications using Docker, improving environment consistency and deployment time by 30%.

SupraEdge Technologies — Application Developer

Jun 2020 – Jul 2021

- Contributed to end-to-end web application development using ReactJS, ASP.NET MVC, and C#, ensuring responsive

and dynamic user experiences.

- Designed and optimized MySQL and Oracle SQL queries for high-volume data processing, increasing data retrieval speed by 45%.
- Developed reusable React UI components with modern CSS libraries (Bootstrap, Material UI), improving code maintainability by 30%.
- Built and consumed REST APIs for data integration across multiple modules, enhancing data accuracy and consistency.
- Supported migration of legacy PHP modules to .NET microservices, improving system reliability and reducing server downtime by 20%.
- Collaborated with QA teams for regression and integration testing, achieving 95% defect-free deployments.

EDUCATION

Master of Science in Computer Science, University of Texas at Arlington

Coursework: Intelligent Systems, Machine Learning, Software Engineering, Data Mining, AI-ML, Web Data Management, Design & Analysis of Algorithms.

Bachelor of Engineering in Computer Science, BMS Institute of Technology and Management

Coursework: Big Data Analytics, Advanced Java & J2EE, Cloud Computing, Advanced .NET Development

TECHNICAL SKILLS

Frontend: ReactJS, TypeScript, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Material UI

Backend: ASP.NET Core, ASP.NET MVC, C#, Node.js, PHP

Databases: SQL Server, Oracle SQL, MySQL, NoSQL (MongoDB)

Cloud & DevOps: Azure App Services, Azure Functions, Docker, Kubernetes, AWS (EC2, S3), CI/CD, Azure DevOps

Testing & QA: NUnit, Jest, Postman, Unit Testing, Integration Testing, End-to-End Testing

Tools & IDEs: Visual Studio, Eclipse, Maven, Git, JIRA, TFS, XAMPP, Tomcat

Concepts & Practices: Microservices, RESTful APIs, Design Patterns, Agile Development, Cloud-Native Architecture, Modular Component Design, Secure Coding

PROJECTS

- **Tourism Management System:** Developed a full-stack platform using ReactJS, JavaScript, ASP.NET, and SQL Server for managing customers, bookings, and hotels with secure RESTful APIs.
- **Heartbeat Monitoring Device:** Designed a real-time heart rate detection system achieving 90%+ accuracy across 5000+ readings.

CERTIFICATIONS & RESEARCH

- **Microsoft Full Stack Developer Capstone Project** – Microsoft Certified
- **Research Publication:** *Software Effort Estimation using Function Point Analysis* – Springer Journal
- **Advanced React** – Meta Certified
- **Blockchain Basics** – University at Buffalo
- **Responsive Website Basics: HTML, CSS, JavaScript** – University of London

KEY STRENGTHS

- Expertise in ReactJS, TypeScript, and modern UI development, delivering responsive, high-performance front-end applications.
- Strong backend development skills with ASP.NET Core, C#, and RESTful APIs, building scalable and secure enterprise systems.
- Hands-on experience with Docker, Kubernetes, and cloud deployments (Azure & AWS) for CI/CD and scalable architectures.
- Skilled in test-driven development, unit/integration testing, and database optimization (SQL Server & Oracle) to ensure high-quality, maintainable solutions.
